

PITCH EXERCISE 1.1

GETTING TO KNOW THE DO-FA TETRACHORD

(Hover over Audio Image to make player visible.)

The following series of examples familiarizes you with the various pitch relationships, called INTERVALS, within the DO-FA tetrachord.

- First you will hear the note DO, which is our starting point or reference point.
- Next you will hear a pattern of notes, described by their Sol-Fa names, and the pitches themselves.
- During the silence that follows, sing the notes you've just heard, using their Sol-Fa names.
- Then you will hear the notes repeated again, so you can check yourself.

The very first time through this exercise, it is recommended that you only listen to the Audio Track and repeat what you hear.

After going through the exercise in this manner, proceed to the next page and play the Video, following the worksheet visually as you sing the notes again.

18.

As you do this and the following exercises, you may find it helpful also to make the Kodály hand signs with your hand, as an extra reinforcement. (Print out the chart on Slide 8 of Unit 1.2 and keep it handy for easy reference.)

After completing Exercise 1.1, ask yourself whether it was easier to do with or without the visual cues? Why?

If you found the visual cues distracting, do the exercise again with the video, and see if it becomes easier with practice.

Learning to use Sol-Fa is a little bit like learning your multiplication tables: there is a certain degree of rote learning involved, which occurs through repeated practice.

Once you've learned them (whether multiplication or Sol-Fa), they become part of you, and you can recite (sing) them almost automatically. **THAT IS OUR GOAL IN THIS COURSE!**

PITCH EXERCISE 1.2

THREE NOTES IN DO-FA — LISTEN AND REPEAT

This series of exercises allows you to practice many of the three-note patterns that can be formed using the four notes of the DO-FA Tetrachord, patterns you will actually find in Orthodox chant.

As in the previous exercise,

- listen to the starting note and the pattern specified by the Sol-Fa syllables
- sing the pattern using the Sol-Fa syllables (and hand signals)
- check yourself after you've sung it.

PITCH EXERCISE 1.3

THREE NOTES IN DO-FA — SING AND CHECK

This series of exercises is similar to the preceding ones. After hearing the starting pitch, you will be asked to sing a three-note pattern formed from the four notes of the DO-FA Tetrachord, but it won't be played for you. And there is no visual handout to follow. Thus, you will have to apply the knowledge gained from the previous two exercises.

As in the previous exercise,

- Listen to the starting note and the requested pattern of Sol-Fa syllables
- Sing the pattern using the Sol-Fa syllables (and hand signals)
- Check yourself after you've sung it.

This file contains only audio, no video.

(Hover over the audio image to reveal player.)

PUTTING IT ALL TOGETHER

Now that you've learned just a few basic concepts about rhythm and pitch, you are ready to “sight-sing” some simple church melodies.

Knowing in advance what the melody might be is not important (though it's fun to recognize “old friends” in an unusual notation).

More important is the confidence you will gain from **reading at sight** previously unseen melodies using basic rhythm and Sol-Fa notation.

REMEMBER THESE RULES!

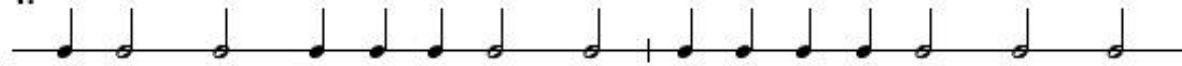

1. Establish the pulse (beat)
2. Read through the rhythm only on “ta” and “too-oo”
3. Keep a steady pulse as you add the pitches to the rhythm

Here is a link to a free adjustable online [metronome](#) that you can use to keep the beat. First set it to 80, then adjust it to a faster (higher) or slower (lower) number.

Here is a link to a virtual piano keyboard: <https://www.onlinepianist.com/virtual-piano>
Find a pitch that seems comfortable in your voice range, and use it as a starting DO.

HOW TO RECORD YOUR EXERCISES FOR INSTRUCTOR FEEDBACK

The preferred method of recording your feedback is Flipgrid.com or Loom.com. (Please note that your videos will remain private to you and the instructor, and will not be searchable on the web).

Otherwise

1. Select the Voice Memos app on your smartphone
2. Press “Record”
3. Say your name and the name of the exercise you are recording.
4. Complete the exercise.
5. Title the file: Lastname_Ex. #
6. After saving the file to your Google drive, upload it to the appropriate assignment in Google Classroom.

Congratulations!

You have completed Unit 1 of our course!

Don't forget about our face-to-face appointment!

Any questions!

You can find me at:
