

BASIC SIGHT-SINGING AND EAR TRAINING FOR CHURCH SINGERS

FORM ANALYSIS EXERCISES 8.1

INSTRUCTIONS FOR FORM ANALYSIS EXERCISES 8.1

1. Print out each of the PDF files that are linked on the following page. These are taken from the Liturgical Music and Texts section of the OCA website:

<https://www.oca.org/liturgics>

2. For each example, the melody is found in the top voice, the Soprano. In this exercise, you can ignore the other voices for now. For each Tone, analyze, identify, and mark:
 - a. The **macrostructure** of the hymn, using Arabic numerals to denote distinct patterns of pitches, for example, 1, 2, 1, 2, etc. or 1, 2, 3, 1, 2, 3.
 - b. The **microstructure** of each phrase, marking the “beginning,” the “reciting tone,” and the “ending” with a horizontal bracket, and label them accordingly. Check your work against the slides in Unit 8.1.
 - c. Scan or photograph your completed work and email it to OCATeacher1@oca.org.
 - d. Write in the SOL-FA syllables for each Tone, practice and record yourself singing each one.
